Frameworks & Libraries	ASP.NET Core, MVC Core, Blazor, React JS, Angular, jQuery, Flutter, Android Studio
Databases	Microsoft SQL Server
Tools & Platforms	Power BI, Microsoft Azure, Git, HTML/CSS, Adobe Creative tools

PROFESSIONAL EXPERIENCE

Software Engineer **Sep 2023 – Present**
HotelHub Technologies Pvt Ltd | Panjim, India

➢ **Project: HBS (Hotel Booking System) | Full-Stack Development** --- *1yr 11m*
- Built client-facing booking features in **ASP.NET Core, Blazor, C#,** and **SQL Server** for the Hotel Booking System, contributing to a production hospitality platform.
- Implemented booking workflow enhancements that **improved** the **reservations process** and supported a **smoother user experience** across the hotel booking platform.
- Worked on application features spanning frontend interfaces, backend business logic, and database integration.

➢ **Project: Admin | Backend & Administrative Systems** --- *9m*
- Maintained and enhanced core application functionalities **supporting hotel booking operations** and **internal administration**.
- Managed **database operations** and **backend services** for hotel data handling across administrative workflows.
- Enhanced existing modules to support effective **data management, system maintenance, and administrative operations**.

➢ **Project: Hotel Data Management | Data Automation** --- *5m*
- Worked with hotel inventory and property data to **manage hotel listings** across the booking platform.
- Automated **hotel onboarding** and **removal workflows** from client-provided data to reduce **manual processing** in listing updates.
- **Improved the consistency** and efficiency of hotel listing updates by **streamlining data processing workflows**.
- Coordinated data-related operations with application requirements to maintain accurate and up-to-date hotel information.

Associate Software Developer — Internship **Aug 2022 – Oct 2022**
Commscope India Pvt Ltd | Verna, India
- Built a Visitor Pass Generation system in **ASP.NET and C#** that reduced average visitor check-in time by **30–50%** by digitizing registration, security checks, and meeting approvals.

KEY PROJECTS

Wind Speed Prediction App for Anemos Energies | ***Final year project***
- Collaborated in a team of three to develop an **AI/ML-powered wind speed forecasting application** for Anemos Energies using **Flutter and Node.js**, integrating live weather data from Windy.com.
- Developed a next-day (24-hour) **wind speed prediction model** using **five days of historical weather trends**, achieving forecast accuracy within **10–15%** of actual wind speed measurements.

Pizza Ordering & Takeaway Website | ***College Project***
- Developed an e-commerce website for pizza dining and takeaway using HTML, CSS, and jQuery.
- Built interactive web interfaces to **present menu items and support a user-friendly** browsing and ordering experience.

Movie Streaming Platform | ***React.js***
- Developed a responsive movie streaming platform page using React.js, showcasing the latest movies and TV shows.
- Implemented dynamic movie listings with poster images, titles, descriptions, and categories.
- Designed an interactive, user-friendly interface with reusable React components.
- Integrated API-based data fetching to display movie details and keep content updated.

EDUCATION

Master of Business Administration, Information Technology **Expected 2027**
Amity University Online, Noida | CGPA: 8.14

Bachelor of Engineering, Information Technology **2023**
Goa College of Engineering, Ponda | CGPA: 8.34

CERTIFICATIONS
